

Project Design Phase-II

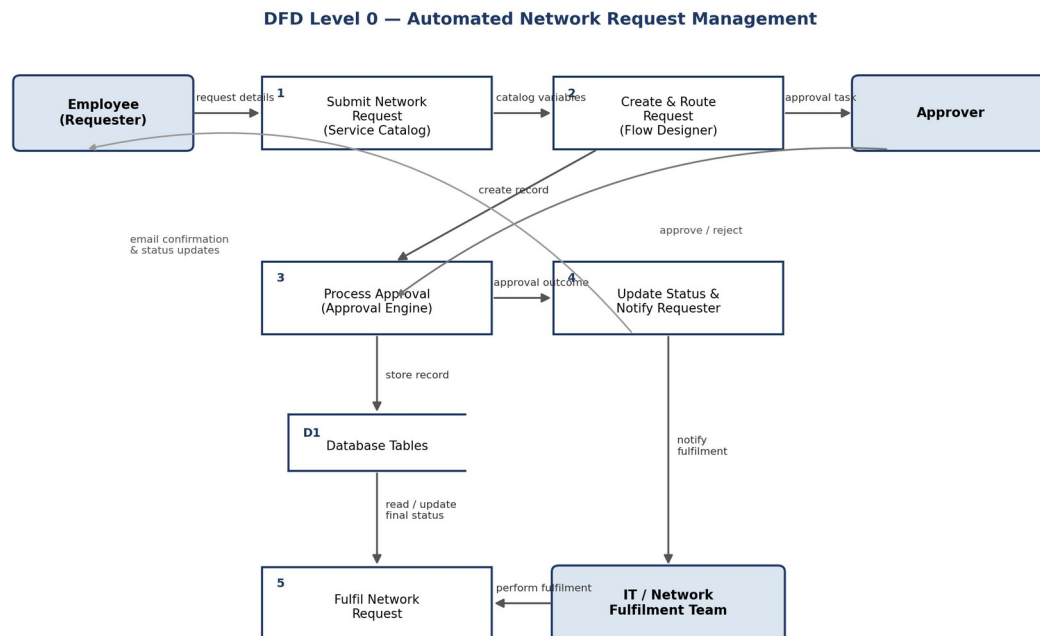

Data Flow Diagram & User Stories

Date	06/09/2026
Team ID	Servicenow
Project Name	Automated Network Request Management
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Automated Network Request Management — DFD Level 0:

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requester)	Network Request Submission	USN-1	As a requester, I can submit a network request through the Service Portal	Request record is created with a unique NRM-prefixed number	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
			by filling in connection type, address, and payment details.			
Employee (Requester)	Conditional Form Behaviour	USN-2	As a requester, I only see the "Existing ID" field when I select Type of Connection = Existing.	Field is hidden for New connections and shown for Existing	Medium	Sprint-1
Employee (Requester)	Notifications	USN-3	As a requester, I receive an email confirming my request was submitted.	Confirmation email is received immediately after submission	High	Sprint-1
Employee (Requester)	Notifications	USN-4	As a requester, I receive an email once my request is approved or rejected.	Status email received matching the approval outcome	High	Sprint-2
Approver (Manager)	Approval Routing	USN-5	As an approver, I receive a request in my approval queue to review and approve or reject.	Approval record appears with correct request details attached	High	Sprint-1
IT / Network Fulfilment Team	Access Control	USN-6	As a fulfilment team member, I can view and update approved requests assigned to my role.	Only users with the u_database_tables_user role can access request records	Medium	Sprint-2
IT Admin	Automated Record Creation	USN-7	As an IT admin, I can see that every submitted request automatically creates a corresponding Database Tables record with no manual entry.	Record fields match the submitted catalog variables exactly	High	Sprint-1
