

Project Design Phase

Problem – Solution Fit Template

Date	06/09/2026
Team ID	Servicenow
Project Name	Automated Network Request Management
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- Understand the existing situation in order to improve it for your target group.

Automated Network Request Management — Canvas:

1. CUSTOMER SEGMENT(S) [CS] • Employees who need a new or existing network connection • Managers who approve requests for their team • IT / Network Fulfilment Team who implement the connection	6. CUSTOMER CONSTRAINTS [CC] • No dedicated system — requests only handled via email or phone • Limited IT bandwidth to manually track and follow up on every request • No visibility into approval status once a request is raised	5. AVAILABLE SOLUTIONS [AS] • Emailing the IT helpdesk directly • Calling IT or the network team for urgent requests • Generic incident/ticket forms not tailored to network requests • Manual spreadsheets used by IT to track pending requests
2. JOBS-TO-BE-DONE / PROBLEMS [J&P] • Get a new or existing network connection set up quickly • Get the request approved by the right authority • Know the status of the	9. PROBLEM ROOT CAUSE [RC] • No centralized digital workflow exists specifically for network requests • Organizational policy requires managerial / network-team sign-off,	7. BEHAVIOUR [BE] • Emails IT or calls the helpdesk to raise a request • Re-sends the same details when there's no response • Escalates through their

request without repeated follow-up	but no system owns that approval step end-to-end	manager if the request stalls
3. TRIGGERS [TR] • New employee onboarding • Team relocation or office expansion • Need for additional bandwidth or a connection upgrade	10. YOUR SOLUTION [SL] • Automated Network Request Management on ServiceNow: a Network Request Service Catalog item, a Request Information variable set, Flow Designer automation, and the native Approval engine — giving requesters a single guided form and real-time status visibility	8. CHANNELS of BEHAVIOUR [CH] • 8.1 Online: Service Portal, Network Request catalog item, email notifications • 8.2 Offline: In-person conversations with IT, phone calls for urgent requests
4. EMOTIONS: BEFORE / AFTER [EM] • Before: frustrated, uncertain, unsupported • After: confident, informed, in control — with real-time visibility into approval and fulfilment status
